

Bestion® BC118H

Strong Acid Cation Exchange Resin

Description

BC118H is a premium grade, porous strong acid cation exchange resin. It is a copolymer of styrene and divinylbenzene with sulfonic acid exchange group. The unique structure allows for high operating capacity and excellent chemical and physical stability. Its matrix promotes better kinetics and better diffusion rates into and out of the bead. Due to the special surface area, pore size, it is used as catalysts in synthetic industry of Bisphenol-A synthesis etc.
